Workshop on 'Cloud Computing'
Organized by BCA Department
Under lead college
Report

What is cloud computing?

Cloud computing is shared pool of configurable computer Systems, resources and higher-level services, that can be rapidly provisioned with minimal management effort, often over the internet. Cloud computing relies on sharing of resources to achieve coherence and economies of scale similar to public utility.

Why it is required for students?

In today's world cloud computing is very important concept to share resource. To keep pace with IT world Student should learn Concept of cloud computing and how to use it practically for their daily routine. Using this student can share hardware software and infrastructural resources.

Details of activity

Name: A lead college workshop on cloud computing

Date: 28/01/2019

Time: 11.00 to 5.00

Sessions: Three

Objectives of Activity-

1. To Introduce Students about new technology
2. To give Detail Knowledge about Cloud computing to students
3. To aware students about applications of technology in industry

4. To give knowledge to students about importance of cloud computing.
5. To give knowledge to students about where information is stored in cloud computing

Description of activity

At start there was an inaugural session Dr. Sayyed S.G. was Chief Guest for Inaugural Session explained in short about what is actual meaning of cloud computing. she also explained about what is importance of technology in today's world. Also she said that we have to learn about new technology to keep in a competitive world. President of the function .Dr. Sunita Gharge given a presidential speeches she said that students in today's world should be aware of all new technologies and students of BCA should be always knowledge seekers. HOD Sawant M.B. introduced the Session and Mrs. Kadam A. S. given vote of thanks

In first session Ms. Sayyad T.J. ,Asst. Prof. Computer Science and Engineering Dept, KBP Engineering College, Satara. Explained in detail concept of cloud computing she said in cloud computing you can use virtual machines . According to her concept research started in 197, but it really developed in 1997 by Texas University. Cloud Computing is one type of distributed computing .you can use internet to create an online classroom through cloud computing. In this we can use Google, Yahoo .Cloud Computing is having two types private and public cloud. You can use cloud computing for distributed servers, client computers, and data centers. What is data center lab how it is useful to all. How can we deploy cloud . How the deployment of cloud computing is important. How the deployment effects on cloud computing Also She explained about models of cloud computing like SaaS Software as service PaaS Platform as a service, Infrastructure as a service IaaS. What are the importance of cloud computing and drawbacks of cloud computing.

In second session Mr. Kazi S.C. ,Asst. Prof. Computer Science and Engineering Dept., KBP Engineering College, Satara explained about concept of virtualization . How it is used what are its importance and drawbacks. He said that Virtualization means use of virtual machines . How can we use virtual machines in Cloud Computing. How we use Google cloud in virtualization. We can create a Google Classroom and with the help of that we can do our work of sending assignments ,

notes, notices to students in minutes. We should have to apply security while creating Google classroom.

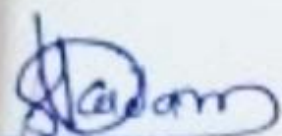

In third session Dr. Kumbhar R.D., HOD Asst. Prof. Computer Dept., KBP Institute of Management Science and Research, Satara. Explained about applications of cloud computing in various Central bank System. How the data is placed in Banks and in which format it is placed it is explained by him. How this concept is applied in City Bank at first.

After a Lead college activity students of Ty BCA Started a Google Classroom and accessed it practically. For this activity BCA lead college coordinator Kadam madam, HOD Sawant madam, Prof Nikam S.B. and Prof. Gaikwad P.V. were present.

Output

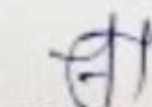

Student learned the concept of cloud computing and virtualization and also applied it practically by creating Google Classroom. For this lecture 72 students were present. Students of BCA from D. G. Collge, Satara. KBP Institute of management, Varaye and Students and staff from D.P. Bhosale College Koregano

Were present
