Short Term Course "Introduction To Data Science"

BCA -I - (2020-2021)

Report

Co-ordinator Name- Mr.Nikam S.B.

Department – BCA

Introduction-

As the world entered the era of big data, the need for its storage also grew. It was the main challenge and concern for the enterprise industries until 2010. The main focus was on building framework and solutions to store data. Now when Hadoop and other frameworks have successfully solved the problem of storage, the focus has shifted to the processing of this data. Data Science is the secret sauce here. All the ideas which you see in Hollywood sci-fi movies can actually turn into reality by Data Science. Data Science is the future of Artificial Intelligence. Therefore, it is very important to understand what is Data Science and how can it add value to your business.

Data science is all about finding and exploring data in the real world and using that knowledge to solve business problems. Some examples of data science are:

Customer Prediction - System can be trained based on customer behavior patterns to predict the likelihood of a customer buying a product

Service Planning - Restaurants can predict how many customers will visit on the weekend and plan their food inventory to handle the demand

Course Statistical Report –

Total Student Participated	Total Students in Exam	Total Passed Students with certificate	No of projects	Remark
31	25	25	-	

Objectives of the course:

1. Understand the need for Data Science.
2. To know the concept of Data Science?
3. To know different Data Sources and Programming Platforms
4. Understanding statistics for data science
5. Knowing different Data visualization tools
